

# NEW: CREAMY VEGETABLE SOUPS

Cooking is art!

We swung the wooden spoon and created six surprising flavours which are delightfully creamy and just as varied as you would think when you see their different vibrant colours.

What's in it? A lot of good vegetables and a healthy portion of inspiration.

With it, you can conjure up a delicious warm meal and serve it in five minutes, making everyone happy for whom everything must again go fast but who want something delicious and well-balanced.

# Curious?

## Our vegetable soups: exquisite, creamy and creative

Our six flavours innovatively combine classical vegetables and creatively season them with fruit, berries and spices.

### NAbio creamy vegetable soups

	SWEET POTATO, APPLE + <i>Curry</i>	vegan	380 ml	6	12	175	7	25

## Packed with good stuff:

### Cranberry

Cranberries strengthen the immune system and contain minerals such as iron, potassium and sodium, but also a wealth of vitamins and antioxidants. These antioxidants slow down the cell aging process and protect against diseases.

### Red Lentil

Red Lentil are a valuable source of protein not only for vegans and vegetarians. They have a large amount of potassium, magnesium, iron and zinc. In addition, lentils have a high proportion of B vitamins, which are among other things for the nervous system.

### Coconut

The lauric acid contained in the coconut oil is known for its antimicrobial and antiviral activity. Lauric acid has the ability to penetrate cell walls and thus frees the human body from harmful pathogens.
